EDGE First Responder Sandbox

Immersive Training

Features

- EDGE software is free for eligible federal, state, and local first responder agencies (FRS v1.2 and 2.0), accredited educational institutions (FRS 2.0), and is licensable for all other organizations.
- Open “sandbox” concept not tied to a pre-defined set of tactics and doctrine; allows training for custom tactics and the ability to evaluate the efficacy of new doctrine and procedures
- Ability to train multiple simultaneous trainees, and conduct multiple training sessions in a single day
- Multiple role types including: Fire, EMS, Law Enforcement, unified command, dispatch, teachers, school administrators, etc. to facilitate cross-organizational training
- Full recording and playback of training sessions for After Action Review (AAR)
- As a virtual representation of live training, EDGE provides a cost-effective solution to supplement and reinforce live training
- See more about both FRS v1.2 and FRS v2.0 on our website (cesiedgetraining.com)

Cole Engineering Services, Inc. offers additional development and training services to help deploy FRS training to user organizations to maximize the educational benefits. CESI's goal is to apply its world-class engineering expertise to provide the most effective and stable training systems to first responders and educators.
